

# Programmers 4 I.T. People

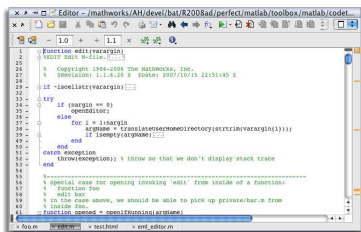

**“Do you need technical help to create, link, change or fix applications or reports?”**

Create advanced Excel spreadsheets or Access databases and Applications

**Build reports**, create dashboards, show statistics and see trends

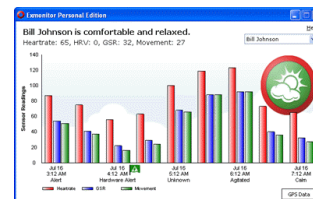

Create small or large bespoke utilities to perform business tasks: Databases, SMS, Emailing, File Moving

Create clever **login scripts** that can install printers, adjust workstations, setup drive letters automatically

Building new or configuring current Intranets/Websites; including controlled software installing

Bespoke System Monitoring and automating maintenance tasks

Centralised phone list systems that tie into *Active Directory* (and can provide automatic signatures and disclaimers on email)

Create **WebServices** or connections to your clients' systems for direct order processing / stock control and links to ERP systems

**“Where the IT Support ends, we Begin!”**

*We are a low cost option to having expensive Programmers in-house.*

Just give us a call on **01256 811066** or visit [www.webforces.co.uk](http://www.webforces.co.uk) for further information....
